## HOPE CITY CHURCH

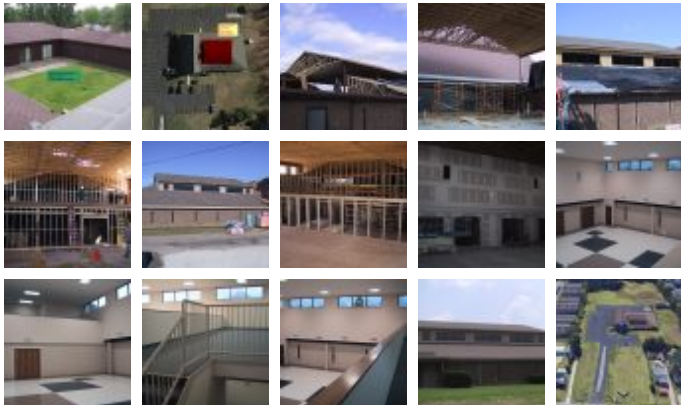

### Schools and Churches

Square Feet : 3,600 sf.

Project Location : 7515 3rd Street Road  
Louisville, Ky. 40214

Contruccion Dates : *completed in 2001*

End User : *Church School*

3600 sf courtyard infill project and interior remodel. This project serves as a gym/multipurpose facility. The project was challenging as the entire project had to be built through a 6' x 7' double door tunnel through the existing building. The project was built while the church school was in operation.

The project included an interior mezzanine, classrooms, class room remodels, a raised roof with high wall lights allowing natural light in the building. the existing parameter double sloped roofs were dismantled and reworked to become single sloped roofs off of the infill building addition.

Designed and build by Lichtefeld, Inc.
