

"Let LICHTEFELD Handle the business of building while YOU handle building your business!"

MEREDITH MACHINERY

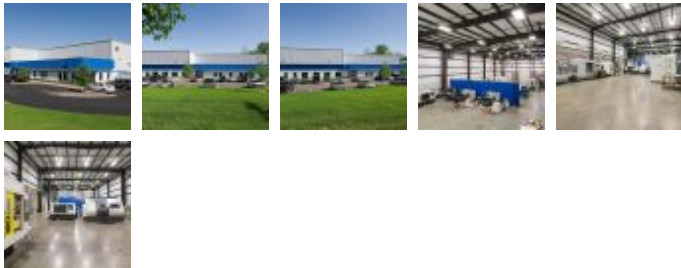

Office / Warehouse

Square Feet : *11,550 square feet included second floor office.*

Project Location : *2600 technology Drive, - Louisville, Kentucky 40299*

Construction Dates : *February 2007 to August 2007*

End User : *Office/industrial/Manufacturing*

6,900 square foot building addition with 2,325 square feet of mezzanine area. This office warehouse addition has 4,650 square feet of Office two floors with the remainder being warehouse/crane equipment storage and testing operations. The interior of the current facility also had remodeled area to demo and refinish. This project had to be built while the owner was in business running its day to day operations. The project went seamlessly as construction went on during normal business hours. The building was on time and one budget despite challenging winter conditions and soils conditions that had to be dealt with.

Designed and built by Lichtefeld, Inc. partnered with Berry Prindle and associates.
