

MILLER MOTOR COACH MAINTENANCE GARAGE

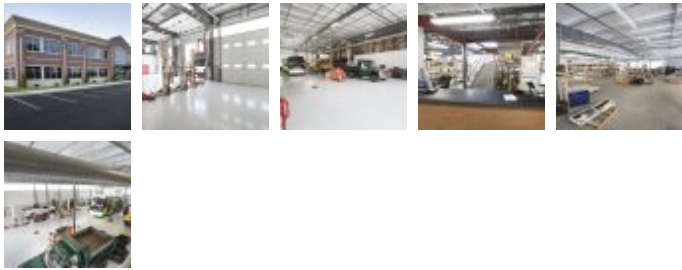

Trucking Facilities

Square Feet : 24,000 s.f.

Project Location : 111 Outer Loop, Louisville, Kentucky

Construction Dates : 6-1-12 thru 1-31-13

End User : Transportation

24,000 s.f. maintenance garage serves as the repair shop for the buses and motor coaches for this region. There are 12 bays with one in ground pit that covers two bus bays and three wash bays for cleaning and detailing. The maintenance garage is constructed with concrete footings foundations and slabs. The steel structure is by Butler Manufacturing Systems. There is an interior mezzanine for storage, standard insulated overhead doors and pedestrian doors. There are light panels in the side walls to allow for natural light. The building will have an MR-24 standing machine seamed roof system with 25 year warranty. This was designed and built by Lichtefeld, Inc. along with Bayus Works.
