Property Details

This project is a 70′ x 180′ x 22′ indoor pickleball court facility. It is a part of a larger project for the City of Shepherdsville called the Aquatic Center. Lichtefeld, Inc. was awarded the metal building portion of this project as a building attachment to the aquatic pool building. This Butler building is a standard single slope metal building with MR-24 standing machine seamed roof system, 26 gage Shadowall wall panels, Stylewall fluted panels, and storefront glass.

Designed by Lichtefeld, Inc. and partnered with Hagerman Construction with Luckett and Farley Architects.
