

ST. MARY AND ELIZABETH HOSPITAL

Medical Projects

Square Feet : 17,500 s.f.

Project Location : 4444 Churchman Ave. - Louisville, Kentucky

Construction Dates : February 2011 to November 2011

End User : Utility plant

17,500 s.f. new construction of a 2 story masonry facility designed to house the boilers, chillers, emergency generators, and maintenance staff for Sts. Mary & Elizabeth Hospital. The facility will be a structural steel frame with block veneer, concrete roof subdeck with a fully adhered single ply membrane roof. The first floor will house the systems vital to providing HVAC and power for the complex. Office space, workshops, and staff areas will be located at the second floor. The facility will be equipped with an elevator and ADA ramps for accesability of staff members and visitors.

Lichtefeld, Inc. won the hard bid contract and is teamed up with the Trane Company.
